

CHIEF XL

THE "CROWN JEWEL" OF THE
BRAUN AMBULANCE MODELS

This model provides the optimum in room, storage, and comfort.

Built on your choice of the Ford E- or F-450, Chevy G-4500, International TerraStar or Ram D-4500 chassis, you get a powerful vehicle with one of the highest usable payloads in the industry. The Chief XL SolidBody™ Construction boasts headroom height of 72" while taking advantage of the module's 169" length by providing maximum storage both inside and out. Available in the standard package or customized to meet your specific requirements, the Chief XL provides value, comfort, and safety for the patient and crew.

With the exclusive EZ Glide™ Sliding Door, safety and convenience are key advantages for your EMTs. By sliding the door out of the way, snug against the module, the door does not open into traffic or restrict personnel from entering

or leaving the module. Combined with the MasterTech™ Multiplex Electrical Control System and VitalMax™ Lighting System, the Braun Chief XL is the top choice of departments needing quality and reliability for today's ambulance services.

The Chief XL combines the advantages of an impressive module length, storage space, interior room, and high payload capacity in a Type I or Type III configuration. Exterior sides are lowered to offset the higher frame rail height of the F-Series, providing even larger storage capacity in the exterior compartments than even the Type III Chief XL. Interior headroom of 72" and the efficient use of space allow for exceptional roominess.
