

EXPRESS

THE BEST LITTLE "BUS"
IN THE BUSINESS

This model reduces downtime, with fewer maintenance costs, and increases reliability.

Since its introduction, the Express has earned a solid reputation as a workhorse ambulance among many private and municipal EMS fleet managers. Reduced downtime, fewer maintenance costs, and increased reliability have helped win over owners and fleet service personnel alike. The Express provides Braun's exclusive EZ Glide™ Sliding Door, Eberhard Free Floating Latches, MasterTech™ Multiplex Electrical Control System, and our exclusive VitalMax™ Lighting System, a wider aisle for more working space, external backboard storage, and increased interior cabinets, combined with SolidBody™ Construction. The Express is winning high praise not only from the people that work on them, but from those that work in them – paramedics and EMTs.

The Express is built on your choice of the Ford E- or F-350 or Chevy G-3500 with a module length of 144". The Braun Express includes Whelen warning and scene lights and front and rear flush mount light bars.

Braun's exclusive VitalMax™ Lighting System in the Express is very impressive. The all welded aluminum cabinets and interior are protected and sealed with a scratch-resistant durable coating that provides a formica-free interior, eliminates seams and results in a clean, durable, bright environment.

With all these features and more, it's easy to see why the Express is The Best Little "Bus" in the Business.
