

PATRIOT

THE CROSS OVER VEHICLE

If you are looking for an emergency vehicle to act as an ambulance, rescue truck and fire apparatus all in one...the Patriot is it.

With growing demands placed on fire departments across the country, the Patriot model was designed with the fire-based EMS industry in mind. Engineered to respond to more than 95% of emergency calls, this unit will cover EMS-related, light rescue or light suppression dispatches. Featuring a high quality ambulance body that Braun is known for, this model will allow you to provide safe and reliable medical transportation for your patients. Many compartments throughout the unit hold emergency medical equipment and supplies to aid in rescue. The capacity to carry water also allows this vehicle to operate as a fire truck for your service.

Built on a custom chassis, the Patriot is a Type I medium-duty ambulance that provides Braun's exclusive SolidBody™ Construction, the EZ Glide™ Sliding Door, MasterTech™ Multiplex Electrical Control System, and our exclusive VitalMax™ Lighting System. It is built to deliver maximum interior space and increased available payload. With 73 inches of interior headroom and enough room for up to six crew members, emergency medical equipment, extraction equipment and hose storage, the Patriot will help you answer even the most critical emergency calls.
